Annie Oh

**Full-Stack Software Engineer,
Local Beekeeper, &
Your New Best Friend**

With a background in art, design, and science, having a creative outlook has always been my best approach to problem-solving. In keeping an open and curious mind, I think of clever ways to fill the gap between art & design through technology. Through this, my passion for code has seamlessly weaved its way into my everyday interests with beekeeping and beautiful design.
